Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: the closest prior art of record (Flores et al U S Patent No. 5734837 and Lynn et al. (Lynn), U S Patent No. 6606740) do not teach nor suggest in detail defining a real-time new event structure or creating a new workflow for the new event source without modifying the preconfigured workflow engine, or creating a conditional event rule that returns a result to the event source via a callback and adding a workflow, associated with the new event source, without modifying the workflow server engine to be executed on the workflow server engine as a portion of a business rule response to the events and creating a conditional event rule associated with the workflow, said workflow triggered by the executable function in response to receipt of an event from the event source. Flores only teaches business process definitions for workflow enabled applications that only require initial creation of the workflow applications. On the other hand, Lynn teaches general workflow processing framework that provides common objects. Therefore, the prior art of record taken singly or in combination does not teach or suggest the above-stated limitation taken wholly in combination with all the elements of each independent claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Claims 1-3 and 5-25 are allowed.
